

CSO Energy is optimizing their Quality Management System (QMS).

In order to provide even more efficient client tailored approach, with higher quality and at the same time continuously improvement of operational processes and procedures CSO Energy have obtained the DIN ISO 9001:2008 Certification.

Leisnig, Saxony, December 2015

CSO Energy is now certified according to DIN ISO 9001:2008. The DIN ISO 9001:2008 allows CSO Energy to develop a better Quality Management System (QMS), in order to provide a higher quality services to its clients while improving process and procedures in all the services CSO Energy provides: commercial, technical and management. CSO Energy has obtained this Certification because an efficient Quality Management System is a key element that characterized the work they provide and it's in the core of their believes.

The benefits of being certified for the DIN-ISO 9001:2008 is that current and future clients have an assurance of the work being provided, certified by a third party, enhancing the attractiveness of the company in the market and the satisfaction of clients.

The results of using this certification means that the clients always gets an optimization wherever possible, due to: a shortening of time for an activity, high quality results , and a consistently high quality of services. The returns for clients and also CSO Energy are in time and money, allowing everyone to dedicate their resources to other activities, becoming more competitive in the market, which aligns to CSO Energy's approach to satisfy customers and grow with them.

Being CSO Energy the independent service provider that it is, for technical and commercial management of wind farms projects and high voltage substation, together to the fact of being DIN-ISO 9001:2008 certified means that the customers' needs comes first, and are absolutely guaranteed, since it's an independent party with the only goal of provide a high quality service to clients.
