

New customer area on CSO Energy's web site

Bockelwitz, 15th of May 2011: The new customer area appears like a fresh breeze on the CSO Energy's web site – as of now the customer area turns up in a new design and with a new content.

User interfaces, individually adapted to the clients, offer an overview of the monthly income data of the wind farms as well as their proportion of the forecasted yearly income. Furthermore the technical monthly and yearly reports of the current year are now available to download.

With the new customer area customers will get a monthly updated summary of the output of their wind farm at a glance, and with this they get a clearer and quicker overview of their revenues.

With this, CSO Energy offers an additional extra in flexibility and a faster monitoring of the revenues. The new application is open for registered customers at www.cso-energy.com/customerlogin.

About CSO Energy:

CSO Energy is one of the leading providers of technical and commercial facility management services for renewable energy projects. The business division "Wind Facility Management" was created in 1999 and was then further developed between 2006 and 2009 as a Conergy Services GmbH business unit. It subsequently changed its name to CSO Energy in 2009. CSO Energy's service team in Germany is based at its sites in Bockelwitz, Hamburg, Nuremberg and Perleberg. Other employees look after clients in France from the company's Paris and Fruges sites. CSO Energy's installations portfolio currently includes wind farms with a total output of more than 695 megawatts, from which 600 megawatts in Germany and 195 megawatts in France.
